Dear Friends/Supporters:

When you were a child did you enjoy cuddling up to your parents while they read you a book? Did you cherish the moments when your grandparents would take you to get ice cream? While we hope that you had these experiences, we have to ask, "Why would anyone want to deprive a child of these feelings and events growing up?", but it happens everyday. What's even worse is having these experiences and then having them ripped away. Children are kept away from one parent and/or grandparents through separation of the family. Our family court system makes decisions everyday that destroy children's lives all across the United States. These children are missing love and nurturing from half of their family. They are deprived of a key part of their youth.

We at Three Sides to Every Story, Inc. recognize this issue, which is why our founder has made it her mission in life to help families lost in the court systems of today. Every child deserves to have their entire family, including grandparents, actively involved in their lives even if their parents can no longer stay together. No child deserves to go to bed at night and cry themselves to sleep, wondering why they can no longer see mommy or daddy or their grandparents.

Here at Three Sides to Every Story, Inc. we hope to educate everyone as to what these actions do to children. We want to help stop the destruction of the family, but especially help the children keep both fit and loving parents in their lives. We need your help to stop these horrid events from happening to the children of today who will be our leaders of tomorrow.

With Sincere Thanks and Appreciation,

Bessie Hudgins
